

Azure Cost Optimization

Eight-Week Service Offering Built to Help Businesses Achieve Annual Cost Savings on Azure Cloud Service

Introducing the **Azure Cost Optimization** offering, now available through US Cloud. Powered by **VIAcode**, our strategic partner, this service utilizes innovative vBox technology to help you achieve significant cost savings—often up to 30% of your average annual Azure spend.

During the eight-week service engagement, our approach involves identifying and prioritizing key opportunities to reduce costs across your entire Azure environment.

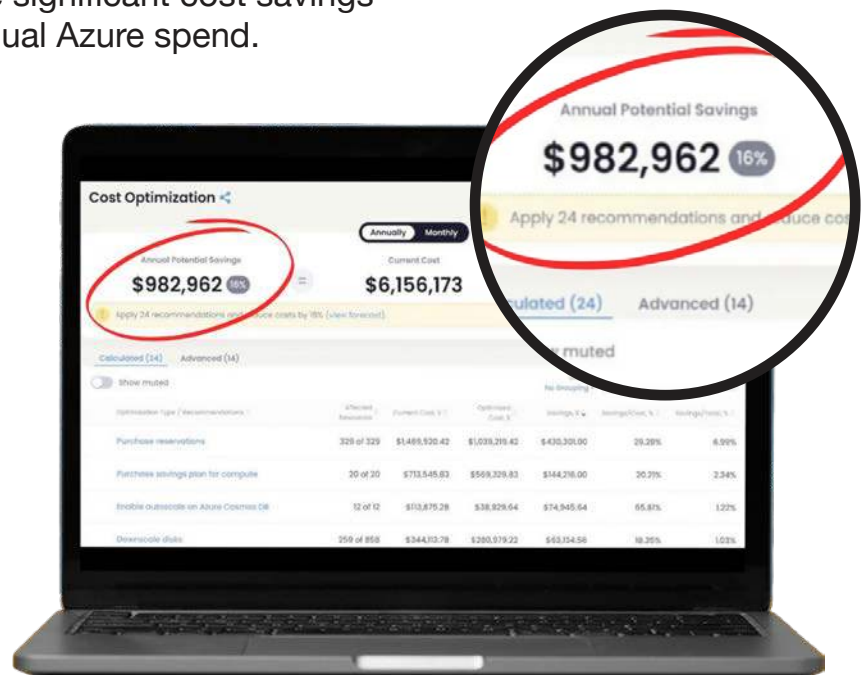

We ensure you maximize your investment by helping you:

- ▣ Rebuild and downscale resources
- ▣ Eliminate unused or underutilized assets
- ▣ Apply reserved instances
- ▣ Leverage the Azure Hybrid Benefit
- ▣ Investigate as many cost-efficient strategies as possible

Our **Azure Cost Optimization** service includes access to the convenient vBox dashboard. Every custom dashboard provides a clear view of current and projected Azure costs, potential savings, and the status of recommended optimizations.

At the conclusion of our six-to-eight-week process, you'll receive a detailed report that:

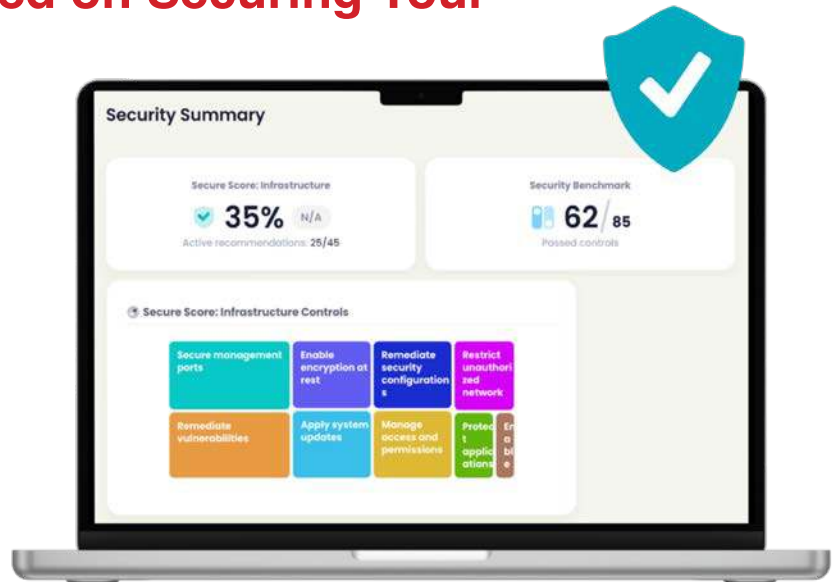

- ▣ Summarizes the actions taken to optimize your Azure account
- ▣ Outlines the savings achieved through the service
- ▣ Offers further recommendations for cost optimization.

Azure Security Assessment

Eight-Week Service Focused on Securing Your Azure Cloud Environment

Protect your cloud environment with US Cloud's **Azure Security Assessment**, powered by our Strategic partner, **VIACode**, and their cutting-edge **vBox** technology. This proactive offering includes a comprehensive service designed to identify and mitigate risks and vulnerabilities across your Azure, AAD, and O365 platforms.

The **Azure Security Assessment** provides expert guidance on best practices, including Defense-in-Depth strategies and advanced encryption techniques to safeguard your data both at rest and in transit.

We push to elevate your security posture and compliance by benchmarking your Azure resources against industry standards like the Azure Security Benchmark, Azure Security Center Secure Score, and Microsoft 365 Exposure Score.

Our service includes access to the intuitive vBox dashboard, which delivers a convenient collection of relevant data, such as:

- ▮ Real-time visibility into your security key performance indicators (KPIs)
- ▮ Confirmed security gaps we have identified in your system
- ▮ Actionable remediation recommendations

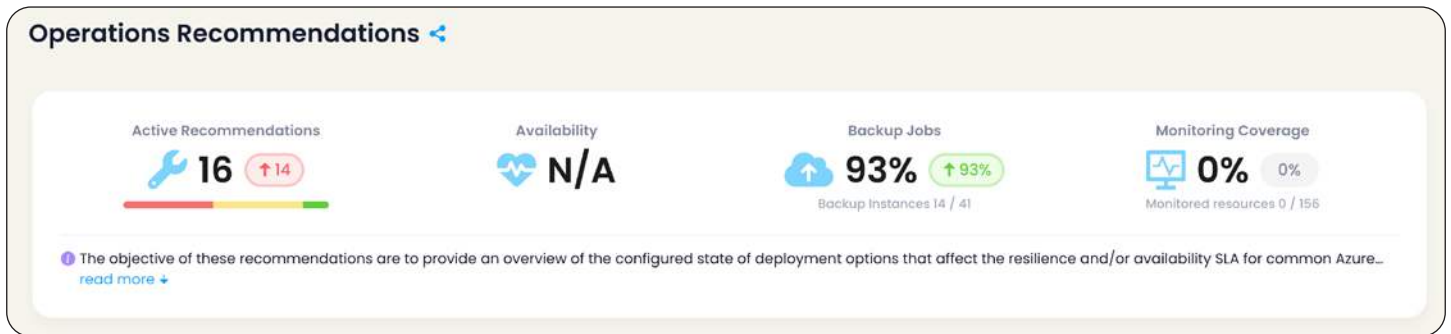

Additionally, we provide best practices for **infrastructure security and compliance** to ensure your cloud environment remains resilient against threats. With the Azure Security Assessment, you can prioritize your security actions based on their impact on your secure score and users. In just six-to-eight weeks, empower your organization to stay ahead of potential threats while optimizing your overall security posture.

Azure Excellence Bundle

Subscription Service Designed to Maintain Long-Term Integrated Efficiency for Your Azure Environment

Unlock the full potential of your Azure environment with the **Azure Excellence Bundle**, a comprehensive subscription package that ensures the seamless management and optimization of your Azure environment.

This all-in-one solution combines three essential Azure services:

- ▮ Cloud Center of Excellence
- ▮ Azure Cost Optimization
- ▮ Azure Security Assessment

Developed to deliver operational excellence, cost efficiency, and enhanced security, the **Azure Excellence Bundle** leverages US Cloud's in-depth expertise and technology. This bundle provides a unified dashboard that consolidates diverse data sets, allowing for easy visualization and better Azure management.

Track **key metrics**, monitor **improvements**, and receive actionable optimization **recommendations**—all from a single, integrated platform.

With the **Azure Excellence Bundle**, you gain a holistic, ongoing solution that empowers your organization to achieve peak performance in your Azure operations, ensuring you stay ahead in an ever-evolving cloud landscape.
